Contents

Alt, W. → Othmer, H. G.
Arbib, M. A. → Chipalkatti, R.
Arzberger, P.: An example of a regular inbreeding system with cubic ancestral growth that preserves some genetic variability 519
Arzberger, P.: Results for generalized regular inbreeding systems 535

Bera, G. C. → Misra, J. C.
Beretta, E., Bischi, G. I., Solimano, F.: Oscillations in a system with material cycling 143
Beretta, E., Capasso, V., Rinaldi, F.: Global stability results for a generalized Lotka — Volterra system with distributed delays: Applications to predator — prey and to epidemic systems 661
Bergh, M. O., Getz, W. M.: Stability of discrete age-structured and aggregated delay-difference population models 551
Bischi, G. I. → Beretta, E.
Bosch, F. van den, Roos, A. M. de, Gabriel, W.: Cannibalism as a life boat mechanism 619
Boucher, W.: Calculation of the inbreeding coefficient 57
Boucher, W., Nagylaki, T.: Regular systems of inbreeding 121
Britton, N. F.: A singular dispersion relation arising in a caricature of a model for morphogenesis 387

Capasso, V. → Beretta, E.
Cheng, K.-S. → Liou, L.-P.
Chipalkatti, R., Arbib, M. A.: The cue interaction model of depth perception: A stability analysis 235
Christiansen, F. B.: Epistasis in the multiple locus symmetric viability model 595

Devanathan, R. → Pal, D.
DeYoung, G., Monk P. B., Othmer, H. G.: Pacemakers in aggregation fields of *Dictyostelium discoideum:* does a single cell suffice? 487
Dietz, K., Hadeler, K. P.: Epidemiological models for sexually transmitted diseases 1
Doi, S., Sato, S.: Regulation of differentiation in a population of cells interacting through a common pool 435
Dunbar, S. R. → Othmer, H. G.

Farkas, A., Farkas, M., Szabó, G.: Multiparameter bifurcation diagrams in predator-prey models with time lag 93
Farkas, M. Farkas, A.
Frenzen, C. L., Maini, P. K.: Enzyme kinetics for a two-step enzymic reaction with comparable initial enzyme-substrate ratios 689

Gabriel, W. → Bosch, F. van den
Garner, J. B., Kellogg, R. B.: Existence and uniqueness of solutions in general multisolute renal flow problems 455
Getz, W. M. → Bergh, M. O.
Grey, D. R.: Harvesting under density-dependent mortality and fecundity 193
Grindrod, P.: Models of individual aggregation or clustering in single and multi-species communities 651

Hadeler, K. P., Waldstätter, R., Wörz-Busekros, A.: Models for pair formation in bisexual populations 635
Hadeler, K. P. → Dietz, K.
Hallam, T. G. → Li, J.
Hardin, D. P., Takáč, P., Webb, G. F.: Asymptotic properties of a continuous-space discrete-time population model in a random environment 361
Hunding, A., Sorensen, P. G.: Size adaptation of Turing prepatterns 27

Keener, J. P.: On the formation of circulation patterns of excitation in anisotropic excitable media 41
Kellogg, R. B. → Garner, J. B.
Kirlinger, G.: Permanence of some ecological systems with several predator and one-prey species 217

Langlais, M.: Large time behavior in a nonlinear age-dependent population dynamics problem with spatial diffusion 319
Li, J., Hallam, T. G.: Survival in continuous structured populations models 421
Liberman, U.: External stability and ESS: criteria for initial increase of new mutant allele 477
Liou, L.-P., Cheng, K.-S.: Global stability of a predator-prey system 65
Lui, R.: Convergence to constant equilibrium for a density-dependent selection model with diffusion 583

Maini, P. K. → Frenzen, C. L.
Mesterton-Gibbons, M.: On the optimal compromise for a dispersing parasitoid 375
Misra, J., Bera, G. C., Samanta, S.: Induced electric and magnetic fields due to wave propagation in a tubular bone 105
Monk, P. B. → DeYoung, G.
Moody, M. E.: A branching process model for the evolution of transposable elements 347

Nagylaki, T. → Boucher, W.

Othmer, H. G., Dunbar, S. R., Alt, W.: Models of dispersal in biological systems 263
Othmer, H. G, → DeYoung, G.

Pakes, A. G.: The supercritical birth, death and catastrophe process: Limit theorems on the set of non-extinction 405
Pal, D., Rudraiah, N., Devanathan, R,: The effects of slip velocity at a membrane surface on blood flow in the microcirculation 705

Rinaldi, F. → Beretta, E.
Roerdink, J. B. T. M.: The biennial life strategy in a random environment 199
Roos, A. M. de → Bosch, F. van den
Rotenberg, M: Mappings of the plane that simulate prey-predator systems 169
Rudraiah, N. → Pal, D.

Samanta, S. → Misra, J. C.
Sato, S. → Doi, S.

Solimano, F. → Beretta, E.
Sorensen, P. G. → Hunding, A.
Szabó, G. → Farkas, A.

Takáč, P. → Hardin, D. P.
Thieme, H. R.: Well-posedness of physiologically structured population models for *Daphnia magna*. How biological concepts can benefit by abstract mathematical analysis 299
Tyrcha, J.: Asymptotic stability in a generalized probabilistic/deterministic model of the cell cycle 465

Vlad, M. O.: Separable models for age-structured population genetics 73

Waldstätter, R. → Hadeler, K. P.
Webb, G. F. → Hardin, D. P.
Wörz-Busekros, A. → Hadeler, K. P.
